US credit unions' credit quality, liquidity positions deteriorating

Gaby Villaluz, Zoe Sagalow and Robert Clark

Thursday, February 29, 2024

More credit unions are seeing regulatory rating downgrades as credit quality and liquidity issues rear their heads.

National Credit Union Administration Chairman Todd Harper is concerned about the safety and soundness of the credit union industry as the number of institutions with <u>adverse CAMELS ratings</u> is on the rise. In a speech earlier this month, the regulator expressed specific concerns about credit quality and liquidity.

Data analysis by S&P Global Market Intelligence found that the industry's overall credit quality is deteriorating while its capital position is a mixed bag.

Credit quality qualms

Problem loans at US credit unions rose again in the fourth quarter of 2023. The industry's net charge-off

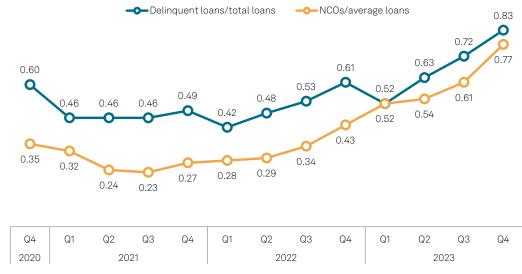

(NCO) ratio climbed to 0.77% in the quarter, from 0.61% in the linked quarter, reaching <u>its highest point</u> in over a decade.

The majority of the surge came from used vehicles and unsecured credit cards, according to the analysis. Used vehicle NCOs were up 36.1% quarter over quarter, while unsecured credit card NCOs jumped 30.5%.

The industry's delinquent loan ratio has also been on the rise, reaching 0.83% in the 2023 fourth quarter, the highest point in the last eight years. Like NCOs, used vehicle loans drove much of the increase.

In his speech, Harper specifically expressed concern about auto and credit card lending.

Delinquent loan, NCO ratios at US credit unions (%)

Data compiled Feb. 10, 2024.

NCOs = net charge-offs; delinquent loans = total delinquent loans greater than or equal to 60 days. Analysis includes all US credit unions except corporate credit unions.

Declining number of undercapitalized credit unions

While credit quality is deteriorating, credit unions' capital positions are generally stronger as the number of undercapitalized credit unions has steadily declined since the third quarter of 2022.

Twenty-one credit unions were considered critically undercapitalized, significantly undercapitalized or undercapitalized in the last quarter of 2023, down from 22 in the linked quarter and 32 in the year-ago period. The number of credit unions considered undercapitalized or below reached a two-year peak in the 2022 second quarter with 44 credit unions.

A credit union is considered undercapitalized by the National Credit Union Administration if its net worth ratio falls between 5.99% and 4% or its risk-based capital ratio is below 8%, if applicable. A credit union is considered significantly undercapitalized if the measure falls between 3.99% and 2%. Critically undercapitalized means the metric is below 2%.

While the number of undercapitalized credit unions declined quarter over quarter, the number of significantly or critically undercapitalized increased.

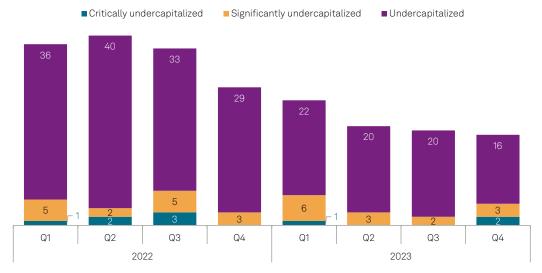

As of the fourth quarter of 2023, Lansing, Mich.-based <u>Gabriels Community CU</u> and Cambridge, Mass.-based <u>Cambridge Teachers FCU</u> were classified as critically undercapitalized, compared to no critically undercapitalized credit unions in the 2023 third quarter. Gabriels Community CU, which had a net worth ratio of negative 8.52%, was purchased by <u>Michigan State University FCU</u> in January.

The number of significantly undercapitalized credit unions increased by one sequentially.

Those deemed significantly undercapitalized were Birmingham, Ala.-based New Pilgrim FCU; Brooklyn, NY-based Transfiguration Parish FCU; and Tuscaloosa, Ala.-based Tuscaloosa County CU. New Pilgrim was acquired by Hope FCU in December 2023, and Tuscaloosa was acquired by Alabama CU in January.

The overall credit union industry's capital position remains strong with a median net worth ratio of 11.68% in the 2023 fourth quarter, a 13-basis-point increase sequentially.

Undercapitalized US credit unions

Data compiled Feb 20, 2024.

Analysis includes current and historical US credit unions that reported a net worth ratio classified as "critically undercapitalized," "significantly undercapitalized" or "undercapitalized" in Form 5300 credit union call report, Schedule G - Prompt Corrective Action Net Worth Calculation worksheet; excludes credit unions less than a year old for each respective quarter and corporate credit unions.

¹⁰ Includes all operating and historical US credit unions; excludes corporate credit unions.

Liquidation, conservatorship activity

Despite the increase in credit unions with adverse CAMELS ratings and declining credit quality for the industry, there has not been a credit union placed in liquidation or conservatorship since July 2023.

Since 2022, nine credit unions have been placed in liquidation or conservatorships. Most recently Yonkers Postal Employees CU was placed in conservatorship in July 2023, and Richmond City Employees FCU engaged in a merger in April 2023 after being placed in conservatorship.

Credit union-bank deals becoming bigger part of M&A landscape

Lauren Seay and Ronamil Portes

Thursday, March 21, 2024

As US banks stay on the M&A sidelines, credit unions are not shying away.

As of March 18, credit unions were buyers in 27.3% of US bank deals announced in 2024, a percentage that would mark the highest total ever in a full year, according to S&P Global Market Intelligence data. Deals in which credit unions buy banks started gaining popularity in 2019 and made up about 5% between then and 2021. But that percentage has been growing since 2022 when interest rates started rising and uncertainty in the operating environment began increasing — as bank buyers took a step back, leaving more room for credit unions to step in.

Credit unions are also increasingly purchasing bank branches, participating in three of the nine most recent bank branch sales.

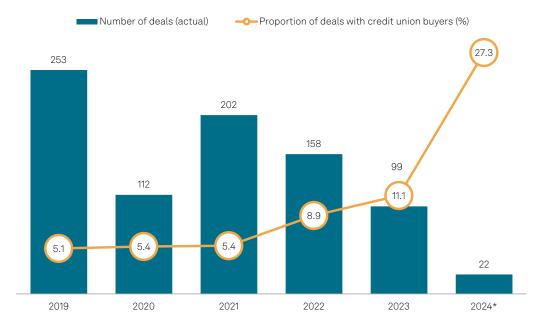

Other records in sight

Sound CU's deal for Washington Business Bank is the latest transaction in which a credit union targeted a bank. It marks the sixth such deal announced in 2024, nearly halfway to the current full-year record of 14 deals in 2022.

That year also holds the record for the most bank assets sold to credit unions at \$5.15 billion, but 2024 is already over halfway to that mark with \$2.90 billion in target bank assets slated to be sold to credit unions.

More than \$1.5 billion of 2024's assets being sold come from Global Federal CU's deal for First Financial Northwest Bank, the largest credit union acquisition of a bank. The average assets of the six banks targeted in sales to credit unions this year is \$438.1 million.

US bank M&A deals announced since 2019

Data compiled March 18, 2024.

Analysis limited to whole-bank and franchise deals announced between Jan. 1, 2019, and March 15, 2024, with a US bank or thrift target; excludes branch, government-assisted, minority-stake and terminated deals, as well as thrift merger conversions.

* Year to date through March 15, 2024.

Price check

In Sound CU's deal for Washington Business, the buyer agreed to pay a premium between 20.6% and 27.7% to the bank's closing share price of \$28.20 prior to deal announcement. That premium is lower than the median level other CUs have paid for banks since 2019, but the buyers in some recent deals have been paying up.

Among credit union-bank deals since 2019, <u>Hudson Valley CU</u> is paying the highest premium to the bank's closing price prior to deal announcement with its 119.0% premium for <u>Catskill Hudson Bancorp Inc.</u>

US credit union-bank M&A deals announced since 2015

^{*} Year to date through March 15, 2024.

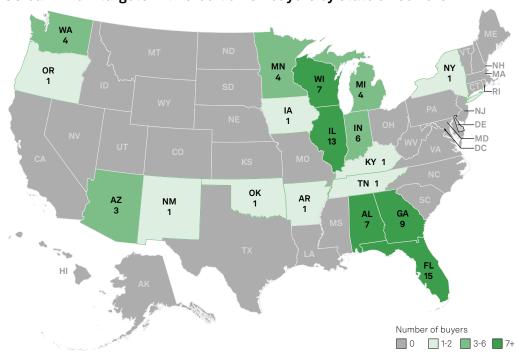

Total assets for the targets are as of the most recent quarter before the deals' announcements.

Deal map

Two of the six credit union-bank deals announced this year have targeted banks in Washington state, doubling the number of such deals in the state since 2015.

The deals indicate that credit unions in different parts of the country are starting to pursue banks. In previous years, transactions with credit unions buying banks were largely concentrated in the Midwest and Southeast.

US banks will trade liquidity pressures for higher credit costs

Zain Tarig and Nathan Stovall

Thursday, April 11, 2024

Liquidity pressures should ease in 2024, but bank managers will face a new headwind in the form of higher credit costs, resulting in a modest hit to earnings, according to the 2024 US Bank Market Report.

The Take

Deposits remain firmly in focus, even with interest rates expected to fall in the second half of 2024. Customers continue to shift funds into higher-cost products and demand higher rates for their funds, while regulators are encouraging banks to hold more liquidity, leading to pressure on net interest margins. That pressure will eventually subside but will be replaced by higher credit costs, particularly as banks begin to recognize losses on their commercial real estate portfolios and reserve for future problems. Still, much of that reserve build will occur in 2024, allowing US bank earnings to rebound strongly in 2025 and 2026 as provisions for loan losses decline and become a much smaller headwind to earnings.

Click here to read the full 2024 US Bank Market Report.

Click here to access data exhibits and the US banking industry's projections template.

Deposits remain in focus even as liquidity pressures ease

Deposit outflows slowed in the third quarter and reversed in the fourth quarter of 2023, with growth resuming in the period. After six straight quarterly declines, deposits grew 1.4% in the fourth quarter of 2023.

Facing outflows, banks defended their deposit bases with significantly higher rates. Growth returned as banks increased what they paid for deposits and narrowed the gap with higher-yielding alternatives in the treasury and markets. That spread is evident when looking at the difference between the average fed funds rate and the industry's cost of deposits, which peaked in the second guarter of 2023. By the fourth guarter, the gap declined by 18 basis points, and we expect that spread to narrow further in 2024 and decrease even more significantly in 2025.

In the aftermath of the large bank failures in 2023, regulators have also pressured banks to bolster their liquidity and encouraged institutions to hold more cash and maintain multiple levers to pull to access funding.

Bank industry aggregate profitability metrics (%)

	2023A	2024P	2025P	2026P	2027P	2028P
Efficiency ratio	57.25	60.30	59.18	58.16	58.02	57.81
Net interest margin	3.22	3.18	3.26	3.35	3.30	3.29
ROAA	1.09	0.97	1.10	1.26	1.28	1.26

Data compiled March 26, 2024.

A = actual; P = projected

Source: S&P Global Market Intelligence, proprietary estimates.

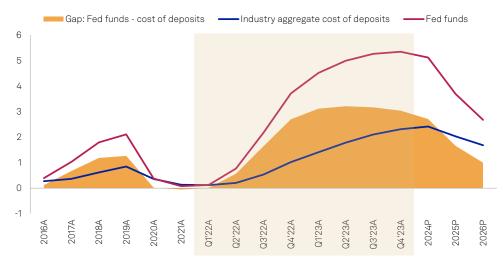

Fierce deposit competition should persist amid regulatory pressures and higher-forlonger interest rates as banks place a higher value on deposits than other forms of funding. Banks deposit costs rose further in the fourth quarter of 2023 even in the absence of rate hikes by the Fed, in part due to a continued shift of funds out of noninterest-bearing deposits and into higher-cost products for institutions, such as brokered deposits and certificates of deposit (CDs).

Interest-bearing deposits have risen 5.1% over the last two years, while noninterestbearing deposits have plunged 28.0%. The decline pushed the industry's noninterest-bearing concentration down to 21.8% of total deposits at year-end 2023 from 25.9% at year-end 2022 and 28.9% at year-end 2021. We expect noninterestbearing deposits to decline further in 2024, dipping to 20.75% of deposits.

CDs have become much larger portions of banks' funding bases. Those products should continue to grow, leading to higher deposit costs. Funding costs will also face upward pressure as CDs originated in 2023 mature and reprice at higher rates.

Rate cuts will offer some relief from deposit pricing pressure late in 2024, while additional rate declines in 2025 will allow deposit costs to fall even further. However, deposit costs should remain relatively sticky even as rates decline. with banks continuing to prize deposits and facing regulatory pressure to do so.

Deposits will grow again as spread between fed funds, cost of deposits narrows (%)

Deposit costs continue to rise even with the Fed on hold

Data compiled March 26, 2024.

NM = Not material.

* Represents YOY deposit beta.

Data is the federal funds rate through 2026 are based on a 4-quarter average of estimates provided by IHS Markit. Actual reported data used when available.

Sources: S&P Global Market Intelligence, IHS Markit, proprietary estimates. @ 2024 S&P Global.

Many bank depositors have also become more ratesensitive as rate hikes have awakened many customers accustomed to receiving rates below 1% to 2% on their deposits in the aftermath of the global financial crisis. Younger consumers had never received higher rates since deposit rates remained muted between 2009 and 2022.

We expect deposit costs to rise in the first half of 2024, even with the Fed's expected pivot to easing rates around midyear. We then project deposit costs to decline modestly in the second half of 2024. Funding costs should drop much faster in 2025, when we project betas, or the percentage change in Fed funds that banks pass on to their customers, to reach 27%, below the level in 2023. While the beta will not be as high when rates fall, bank margins will still rebound in 2025. We project net interest margins will trough in 2024 and then increase by 8 basis points in 2025.

Looking ahead

Credit costs remain historically low for the banking industry, and institutions continue to see minimal stress in their borrowing base. However, borrowers will begin to feel the impact of substantially higher rates, particularly in the commercial real estate (CRE) segment, resulting in higher credit losses.

While we do not expect considerable deterioration in credit quality, we anticipate greater delinquencies and charge-offs in the future. Banks have tried to prepare for slippage by tightening lending standards and building reserves for loan losses. We expect relatively slow loan growth in 2024 as institutions approach new originations more cautiously. Rising funding costs could also give some banks pause to grow their balance sheets notably, but many banks are also putting less cash to work in the bond market as they seek to remain liquid. We also expect banks to continue to build reserves as they work to shore up their balance sheets to clear any potential hurdles ahead.

CRE delinquencies have risen off historically low bases as well, increasing for five straight quarters to the highest level in nearly a decade. Banks have increased reserves against their CRE portfolios, particularly related to office credits. Losses on CRE portfolios have also risen but remain well below levels witnessed during the Great Recession.

Loss content will be location-specific and differ across the subcategories of the asset class, but community banks will feel some pain in their commercial real estate books, particularly as borrowers digest the impact of higher interest rates, less credit availability and lower occupancy since the pandemic.

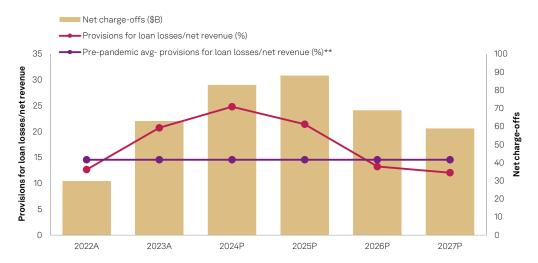

Regulators have reiterated the importance of banks maintaining strong risk management of their CRE portfolios, particularly for institutions with elevated CRE concentrations. In some cases, regulators have imposed independent minimum capital requirements for banks with elevated CRE concentrations.

The number of banks exceeding regulatory guidance for CRE concentration fell for the third consecutive quarter, dropping by 11 sequentially to 532 in the fourth quarter. That number could decline further as banks slow CRE loan growth, engage in risk transfer trades or selectively prune positions.

The test will come when many CRE credits mature, and some borrowers struggle to refinance loans at significantly higher rates. We expect stiffer financial conditions will cause credit quality to slip and lead to notably higher charge-offs in 2024. However, even with net charge-off losses in 2024 expected to jump 30% from 2023 levels, losses and the reserves required to fund them should prove a modest hit to earnings as opposed to the headwind that would occur during a severe downturn.

We expect provisions to rise to 24.8% of net revenue in 2024, up from just 20.7% in 2023. From 2013 to 2019, banks' provisions equated to 14.6% of net revenue on average.

Banks face substantially higher credit costs in 2024

Data compiled March 26, 2024.

A = actual; P = projected.

Scope and methodology

The outlook discussed in this article is based on a proprietary S&P Global Market Intelligence model that utilizes the actual results of nearly 10,000 active and historical commercial and savings banks and savings and loan associations. The outlook is based on management commentary, discussions with industry sources, regression analysis, and asset and liability repricing data disclosed in banks' quarterly call reports. While taking into consideration historical growth rates, the analysis often excludes the significant volatility experienced in the years around the credit crisis.

The outlook is subject to change, perhaps materially, based on adjustments to the consensus expectations for interest rates, unemployment and economic growth. The projections can be updated or revised at any time as developments warrant, particularly when material changes occur.

Bank industry aggregate profitability metrics (%)

New cybersecurity regulations raise bar of compliance at banks, credit unions

Yizhu Wang

Friday, April 12, 2024

A slew of new rules and proposals is raising the cybersecurity compliance bar for banks and financial services companies.

Financial institutions should be prepared for more compliance work, higher litigation risks and potentially more enforcement actions resulting from new cybersecurity regulations, industry experts said. Unlike many other compliance matters examined by specific regulators, cybersecurity has become a universal concern addressed by a broad range of stakeholders, and the list of regulatory bodies to which financial service companies must report cyber incidents is long and growing.

In one example, the US Department of Homeland Security started <u>collecting comments</u> April 4 for the Cyber Incident Reporting for Critical Infrastructure Act. The proposed regulation will require companies in "critical infrastructure sectors" — including banks, credit unions, credit card companies, broker/dealers and the broader financial services sector — to report cyber incidents and ransom payments to the Cybersecurity and Infrastructure Security Agency under the DHS.

US bank regulators are also considering changing how they assess banks' <u>operational resiliency</u>, and one of the highlights is to strengthen banks' ability to manage cybersecurity risks, acting Comptroller of the Currency Michael Hsu said in a speech in March.

Additionally, under new rules adopted by the US SEC in July 2023, publicly traded companies are now required to report <u>material cyber incidents</u> in a Form 8-K filing within four days and to discuss their approach to managing cybersecurity risks in the annual Form 10-K report.

While the rules have applied to publicly traded companies, the SEC is proposing expanding such disclosure obligations to more entities it supervises, including broker/dealers and investment advisers. When and if those proposals are finalized, compliance

work will add up for a large bank with broker/dealer or investment advisory arms, said Justin Herring, a partner at Mayer Brown.

"We're entering into a new phase of cyber regulation," Herring said. "One of the challenges is that a lot of these rules apply to specific kinds of companies. But if you're a large bank or nonbank institution, you probably have subsidiaries with different regulators that will each have their own cyber regulation."

New SEC reporting rules a focus

Bank regulators have already enacted reporting rules about cyberattacks. From May 2022, banks must comply fully with a final rule issued by the Federal Deposit Insurance Corp., the Federal Reserve Board and the Office of the Comptroller of the Currency to report material cyber incidents to their primary bank regulators within 36 hours. The National Credit Union Administration has required all federally insured credit unions to report substantial cyber incidents within 72 hours since September 2023.

While events reported to bank regulators can be kept confidential, the SEC's requirements to report cybersecurity events in Forms 8-K and Forms 10-K will increase the visibility of such incidents that banks may not have had to make public in the past.

Financial services companies are taking a more conservative approach to public disclosures. Although the SEC only requires companies to report material cyber incidents, many have filed Forms 8-K for cyberattacks that they did not believe had a material impact.

SouthState Corp., for instance, filed a Form 8-K on Feb. 9 disclosing a cyber incident three days after it determined the nature of the event. In doing so, the company complied with the four-day reporting window under the SEC rules. Similarly, mortgage company Mr. Cooper Group Inc. disclosed an Oct. 31, 2023,

cybersecurity incident in a Form 8-K filing on Nov. 2. Both companies said they did not believe the events would have a material impact.

While every company can make its own determination whether an incident is material, investors could have different perspectives. If there is a substantial likelihood that a reasonable investor would consider the information relevant and make an investment decision based upon it, a company that did not disclose the incident in timely fashion would be at risk of litigation. said Mark Shaffer, a partner at Tannenbaum Helpern Syracuse & Hirschtritt LLP.

"From a public company perspective, where you never want to be is in possession of material information that you haven't shared with the market, because then you're opening yourself up for securities lawsuits," Shaffer said.

More states updating cybersecurity rules

Various state cybersecurity regulations are another source of complexity for financial institutions to navigate, industry lawyers said.

"Where a lot of the conversation is now is, what do you have to disclose? And who do you have to disclose it to and when? And that gets really complicated because there's both federal rules and every state has slightly different laws," Shaffer said.

The New York Department of Financial Services (NYDFS) is leading the way among state regulators to establish and update its cybersecurity law, known as Part 500. The law was first enacted in 2017 and amended twice. The most recent revisions took effect in November 2023.

By April 15, financial institutions under the supervision of NYDFS, including 159 state-chartered banks and 16 credit unions, will be required to file annual compliance certifications that meet the standards of the newly revised law.

"I would expect that over the next year or two, you're going to see other state banking regulators, besides NYDFS, enact cybersecurity regulations," said Herring, who was formerly the executive deputy superintendent of the NYDFS' cybersecurity division.

As regulators have heightened scrutiny of cybersecurity issues, there will likely be more formal and informal enforcement actions.

"There's going to be more enforcement cases, and there will be more cyber incidents too, where compliance problems will surface," Herring said.

Cybersecurity through the lens of 3rd-party management

With the busy pipeline of new rules and more sophisticated cyberattacks, it is more important than ever for financial institutions to have an actionable cybersecurity response plan, experts said.

"I think there's definitely an uptick in incidents," said Erik Weinick, a partner at Otterbourg PC. "There's an uptick in people reporting incidents, not just because of regulations, but because of other obligations that they may have, such as contracts with others or requirements of their insurance carriers."

Since banks work with vendors on many technology matters, third-party risk management has been a key framework through which regulators assess a bank's readiness to handle cybersecurity incidents. Ultimately, it is the bank that will be held responsible for the selection, oversight and management of its counterparties, vendors and service providers, said Chip MacDonald, managing director at MacDonald Partners LLC.

"After anti-money laundering, cybersecurity and data privacy are two of the highest risk elements that the banks can find, so they can't just hand it off to a third party," MacDonald said.

Although cybersecurity reporting rules may have the benefit of helping detect or prevent cyber events, too much reporting and compliance work can distract banks during an emergent incident, said Mary Ann Miller, fraud and cybercrime executive adviser at the digital identity verification company Prove.

"From the practical standpoint, I see that sometimes compliance can be more of a hindrance for the banks to focus on what's really important, and that's responding to the threats and preventing the threats," Miller said.

Loans contract at credit unions for first time in 13 years

Robert Clark

Thursday, May 16, 2024

US credit unions' total loans and leases fell for the first time in 13 years during the first quarter.

The credit union industry held \$1.616 trillion in total loans and leases as of March 31, down \$1.90 billion, or 0.1%, relative to Dec. 31, 2023, according to regulatory data from S&P Global Market Intelligence. The decline marks the first time the industry's loans have contracted since the first quarter of 2011.

Consumer lending contracts

Much of the decline came from auto lending as new vehicle loans fell 2.5% sequentially and used car loans declined 0.6%. The decreases mark the second consecutive sequential drop, a sharp contrast from prior to the fourth quarter of 2023 when used vehicle loans rose for 50 consecutive guarters.

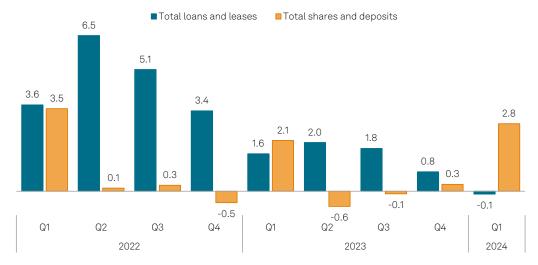

Credit unions also cut back on unsecured lending. Credit card loans declined 1.5%, while other unsecured loans went down 0.9%.

Conversely, loan categories with positive growth included one- to four-family, both first-lien and junior-lien, as well as member business.

Loan and deposit trends

Half of the 20 largest credit unions bucked the overall industry trend. Jacksonville, Fla.-based <u>VyStar CU</u> topped the list with quarter-over-quarter loan growth of 4.5%, though some of that came from its <u>acquisition</u> of Jacksonville, Fla.-based <u>121 Financial CU</u>, which was completed March 1.

© 2024 S&P Global.

On the other hand, North Liberty, Iowa-based <u>GreenState CU</u> reported the highest percentage decrease in total loans and leases at 6.6%, or \$640.0 million. Most of the decline was from vehicle loans, with the used category down \$367.6 million and the new category down \$169.1 million.

Credit unions' liquidity levels benefitted from the lending pullback. As of March 31, liquid assets for the industry totaled \$320.43 billion, up 22.5% from the end of 2023. Liquid assets comprised 23.3% of total assets, reaching its highest point in the last seven quarters.

On the other side of the balance sheet, the industry grew shares and deposits for the second quarter in a row. The 2.8% sequential growth represented the fastest pace in the last two years.

Only three of the 20 largest credit unions reported fewer shares and deposits in the first quarter: San Diegobased San Diego County CU, GreenState and Global CU. San Diego County CU also had the lowest ratio of loans and leases to shares and deposits at 73.15%.

- Read some of <u>the day's top news and insights</u> from S&P Global Market Intelligence.

Credit quality trends

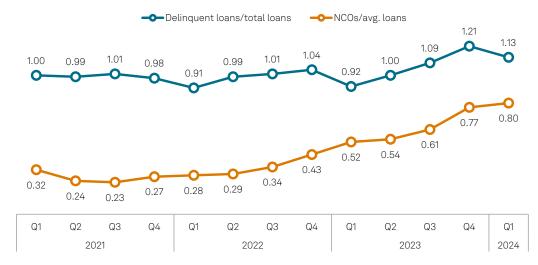

Credit quality was mixed in the first quarter. Net charge-offs (NCOs) as a percentage of average loans rose for the 10th consecutive quarter to 0.80%. But delinquent loans to total loans fell 8 basis points, reversing a three-quarter trend.

The nation's largest credit union by total assets, Vienna, Va.-based Navy FCU, reported the highest NCO ratio among the top 20 institutions at 2.61%.

Tysons, Va.-based <u>Pentagon FCU</u>, which had the highest ratio for the <u>fourth quarter of 2023</u>, saw the most dramatic quarterly decrease at 119 basis points.

However, Pentagon FCU's delinquency ratio jumped 65 basis points, which was a bigger move than any credit union in the top 20 group except for GreenState, which had a 70-basis-point increase. Raleigh, NC-based <u>State Employees CU</u> had the highest ratio of delinquencies at 2.07%, down 18 basis points quarter over quarter.

Delinquent loan, NCO ratios at US credit unions (%)

Data compiled May 13, 2024.

NCOs = net charge-offs.

Delinquent loans are the total delinquent loans greater than or equal to 60 days.

Analysis includes all US credit unions except corporate credit unions.

Data based on regulatory filings.

These materials have been prepared solely for information purposes based upon information generally available to the public and from sources believed to be reliable. No content (including index data, ratings, credit-related analyses and data, research, model, software or other application or output therefrom) or any part thereof (Content) may be modified, reverse engineered, reproduced or distributed in any form by any means, or stored in a database or retrieval system, without the prior written permission of S&P Global Market Intelligence or its affiliates (collectively S&P Global). The Content shall not be used for any unlawful or unauthorized purposes. S&P Global and any third-party providers (collectively S&P Global Parties) do not guarantee the accuracy, completeness, timeliness or availability of the Content. S&P Global Parties are not responsible for any errors or omissions, regardless of the cause, for the results obtained from the use of the Content. THE CONTENT IS PROVIDED ON "AS IS" BASIS. S&P GLOBAL PARTIES DISCLAIM ANY AND ALL EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, ANY WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE, FREEDOM FROM BUGS, SOFTWARE ERRORS OR DEFECTS, THAT THE CONTENT'S FUNCTIONING WILL BE UNINTERRUPTED OR THAT THE CONTENT WILL OPERATE WITH ANY SOFTWARE OR HARDWARE CONFIGURATION. In no event shall S&P Global Parties be liable to any party for any direct, incidental, exemplary, compensatory, punitive, special or consequential damages, costs, expenses, legal fees, or losses (including, without limitation, lost income or lost profits and opportunity costs or losses caused by negligence) in connection with any use of the Content even if advised of the possibility of such damages.

S&P Global Market Intelligence's opinions, quotes and credit-related and other analyses are statements of opinion as of the date they are expressed and not statements of fact or recommendations to purchase, hold, or sell any securities or to make any investment decisions, and do not address the suitability of any security. S&P Global Market Intelligence may provide index data. Direct investment in an index is not possible. Exposure to an asset class represented by an index is available through investable instruments based on that index. S&P Global Market Intelligence assumes no obligation to update the Content following publication in any form or format. The Content should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions. S&P Global keeps certain activities of its divisions separate from each other to preserve the independence and objectivity of their respective activities. As a result, certain divisions of S&P Global may have information that is not available to other S&P Global divisions. S&P Global has established policies and procedures to maintain the confidentiality of certain nonpublic information received in connection with each analytical process.

S&P Global may receive compensation for its ratings and certain analyses, normally from issuers or underwriters of securities or from obligors. S&P Global reserves the right to disseminate its opinions and analyses. S&P Global's public ratings and analyses are made available on its websites, www.standardandpoors.com (free of charge) and www.ratingsdirect.com (subscription), and may be distributed through other means, including via S&P Global publications and third-party redistributors. Additional information about our ratings fees is available at www.standardandpoors.com/usratingsfees.
